

**Job Title:** Sustainability Project Manager

**Terms of employment:** Permanent/ Full time

**Location:** Chattanooga, TN (Telecommuting from any location in the U.S. is an option for this position.)

**Language of work:** English

**Duties:**

- Improving the environmental and human health footprints of purchased products.
- Effectively manage and organize multiple consulting projects that simultaneously cross several dimensions of WAP Sustainability's core services.
- Ability to define and communicate solutions to unstructured problems while being effective at both high-level thought and the management of relevant details. Proactively anticipate client and market needs while developing and communicating potential solutions and service opportunities.
- Ability to understand a client's business model and culture to identify how and where sustainability can supplement and drive their unique business value.
- Ability to navigate through complicated and complex data to understand what is essential in moving a project forward towards completion.
- Experience modeling and managing Life Cycle Assessments using GaBi, OpenLCA, SimaPro, and EIME.
- Experience conducting and managing embodied carbon assessments using the WRI Sector Supplement for Measuring and Accounting for Embodied Emissions in the Built Environment.
- Experience using the WRI/WBCSD GHG Protocol to conduct and manage scope 1, scope 2 and scope 3 GHG inventories.

**Requirements:**

- U.S. Master's degree in Sustainability Solutions; Civil, Environmental, and Sustainable Engineering; or a closely related field.
- Graduate-level coursework required in: Life Cycle Assessment (CEE 506); Solving problems with Life Cycle Assessment (LCA) (IND 598); and Design Sustainability (DSC 598).

**To apply:**
